

# TNTS1

Digital Terrestrial Receiver  
Recorder - Media player

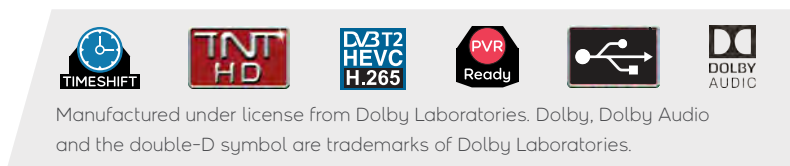

With the smallest DTT Receiver on the market (11 cm), functional, discreet and reliable, enjoy the full range of DTT channels in High Definition with exceptional audio and video quality.

Equipped with a USB port to which you can connect an external unit, it is ideal for recording (1), watching and reviewing your favourite programmes.

With the Multimedia function you can listen to your music, watch your films and view your photos. The Time Shift function allows you to stop watching a programme, go about your business and resume it whenever you want, just like with a DVD.

With the remote control and display DEP2F kit supplied, you can control the adapter while hiding it behind the TV.

(1) with the addition of an external unit (USB key or hard disk) not supplied.
